Supplementary Figure 1. Representative chromatogram of OPPs in the herbal mixtures

The definition and values of variables in equation 2

Where, EF = exposure frequency (day/yr) = 350; ED = exposure duration = 6 and 30 years for children and adults respectively; ATnc = averaging time for non-cancer = ED x 365 and RfD = oral reference dose. The RfD values used were chlorpyrifos (1×10^{-3}), chlorpyrifos methyl (1×10^{-2}), diazinon (7×10^{-4}), pirimiphos methyl (7.3×10^{-4}), quinalphos (5×10^{-4}), azinphos ethyl (3×10^{-3}) and EPN (1×10^{-5}).

Supplementary Table 2. OPPs concentrations in the individual herbal mixtures
