The editors of EVCNA would like to extend our gratitude and recognition to the following reviewers for their precious time and efforts in appraising the received manuscripts, regardless of whether the papers they reviewed were finally published in 2022 [Table 1].

We greatly appreciate the contribution of expert reviewers, which is crucial to the journal's editorial decision-making process. As a token of gratitude to our reviewers, in 2023, we will create an account for each of them in the submission system, and they can access details of their past reviews, see the comments of other reviewers, and download a letter of acknowledgement for their records. In addition, the Editorial Office will select two "Best Reviewers" in 2023 and each awardee will be awarded USD 350. Thanks again for their generous support in the past year.
