Northwest China

Shaanxi	39,528,999
Gansu	25,019,831
Ningxia	7,202,654
Xinjiang	25,852,345
Qinghai	5,923,957
Subtotal	103,527,786

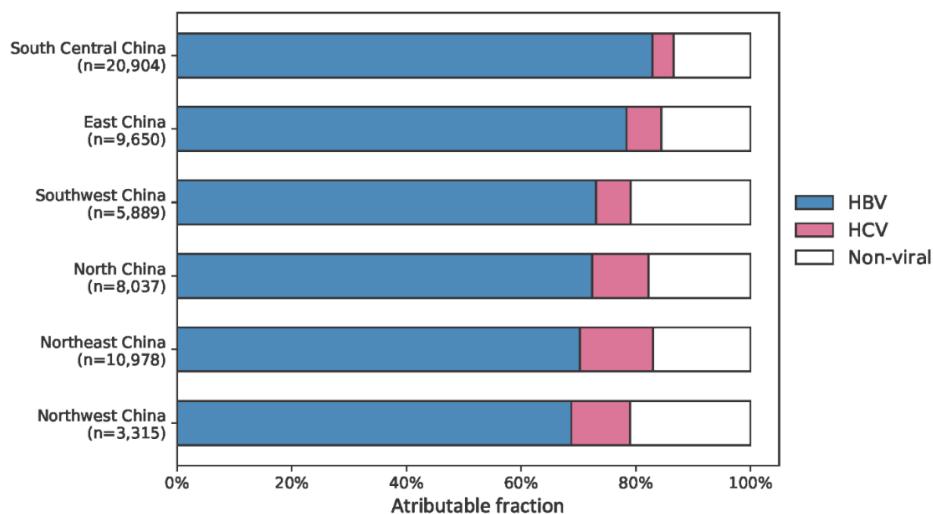

Southwest China

Sichuan	83,674,866
Chongqing	32,054,159
Yunnan	47,209,277
Guizhou	38,562,148
Tibet	3,648,100
Subtotal	205,148,550

China mainland^a 1,409,778,724

^aPopulation of Servicemen was not counted in our analysis. Data source:

<https://www.stats.gov.cn/sj/pcsj/rkpc/7rp/zk/indexch.htm>.

Supplementary Figure 3. AFs of HBV, HCV and non-viral etiology in PLC cases by six administration regions. The regional AFs of HBV, HCV, and non-viral etiology were weighted using pooled estimates in each province and the population sizes of the regions (see method). AFs: Attributable fractions; HBV: hepatitis B virus; HCV: hepatitis C virus; PLC: primary liver cancer.

*One study (2017, Wang MJ et al.) was not counted in Table 1 due to duplicated data with the study (2022, Lin JS et al.), but contributed to the subsequent analysis by age and sex.

^aThe regional AFs of HBV, HCV, and non-viral etiology were weighted using pooled estimates for each province and the population sizes of the regions (see method).

^bThe overall AFs of HBV, HCV, and non-viral etiology were weighted using pooled estimates in each region and population sizes of regions (see method). HBV: Hepatitis B virus; HCV: Hepatitis C virus; CI: confidence interval.

Supplementary Table 5. The attributable fractions (AFs) of HBV-only, HCV-only, co-infection of HBV and HCV, non-viral etiology among 44,183 hepatocellular carcinoma (HCC) cases in mainland China by region and province

Multiple regions					
Subtotal	6	12,656	83.5% (83.2-84)	2.1% (2.0-2)	14.4% (14.1-15)
<i>Overall*</i>	<i>154</i>	<i>44,183</i>	<i>76.6% (76.4-77)</i>	<i>6.8% (6.7-7)</i>	<i>16.6% (16.4-17)</i>

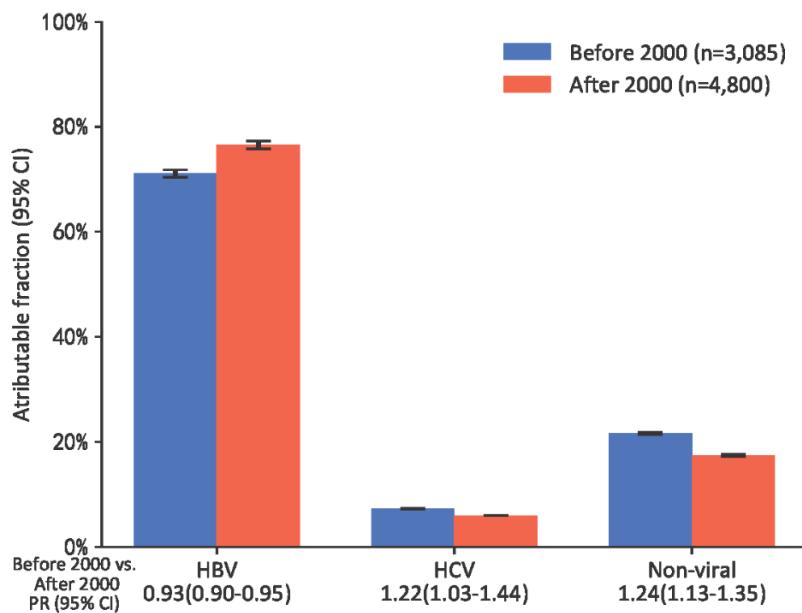

* The overall AFs of HBV, HCV, and non-viral etiology were weighted using pooled estimates in each region and population sizes of regions (see method). HBV: Hepatitis B virus; HCV: Hepatitis C virus; CI: confidence interval.

Supplementary Figure 4. Attributable fractions (AFs) of HBV, HCV and non-viral etiology in HCC and ICC cases. HBV: Hepatitis B virus; HCV: Hepatitis C virus; HCC: hepatocellular carcinoma; ICC: intrahepatic cholangiocarcinoma.

Supplementary Figure 5. Attributable fractions (AFs) of HBV, HCV and non-viral etiology in HCC cases recruited before and after 2000 years. HBV: Hepatitis B virus; HCV: Hepatitis C virus; HCC: hepatocellular carcinoma.

Supplementary Figure 6. Attributable fractions (AFs) of HBV, HCV and non-viral etiology with restriction in PLC cases detected by HBsAg and anti-HCV before and after 2000 years. HBV: Hepatitis B virus; HCV: Hepatitis C virus; PLC: primary liver cancer.
