

Bio:

Prof. Fengwei Yu obtained his Ph.D. degree from Institute of Molecular and Cell Biology, National University of Singapore in 2003. Immediately after graduation, he joined Temasek Life Sciences Laboratory (TLL), Singapore to establish his independent research group. He was promoted to be a Senior Principal Investigator in 2013. He was awarded the Singapore National Young Scientist Award as the sole winner in the biomedical category for his breakthrough research on neural development and neurological disorders in 2007.

Prof. Yu has published over 40 SCI papers with more than 2900 citations and an H index of 25.

Prof. Yu's current research fields include neuronal development and age-dependent neurodegenerative disease using *Drosophila* as an animal model.
