

Bio:

Prof. Yi Tang, MD, PhD is a Chief Neurologist and Professor in neurology for the Department of Neurology, Innovation Center for Neurological Disorders at XuanWu Hospital, Capital Medical University, Beijing, China.

After graduating from Peking Union Medical College with MD and PhD in 2006, he completed his residency in neurology at Xuanwu Hospital. Continuing his education overseas, he accepted a post-doctoral fellowship at Weill Cornell Medical College/New York Presbyterian Hospital. Currently Prof. Tang serves as the Deputy Director for the Key Laboratory Neurodegenerative Diseases for the Ministry of Education in China. He has received “China Outstanding Young Neurologist Award” in 2016 and “Beijing Science Fund for Distinguished Young Scholars” in 2019.

Prof. Tang has authored 65 internationally peer reviewed papers and 4 book chapters. He is also the principle investigator of 4 national and 10 provincial research projects. Except for clinical practice, his primary research focus is identifying new biomarkers for Alzheimer’s disease, and nonpharmacological interventions for Alzheimer’s disease and dementia, including computerized cognitive training and transcranial current stimulation. Among other activities, he acts as the vice youth president for both Chinese Society of Neurology and China Neurologist Association, the member of cognitive impairment disorders committee, China Neurologist Association and senior associate editor for the journal, Alzheimer’s & Dementia.
